Sverchok
demo reel²

FACT:

Temperature can be determined by crickets: to do this, count sounds quantity per minute, devide on two, add nine, again devide on two. The result is the temperature in degrees of mr. Celsius

DOWNLOAD EXAMPLES:

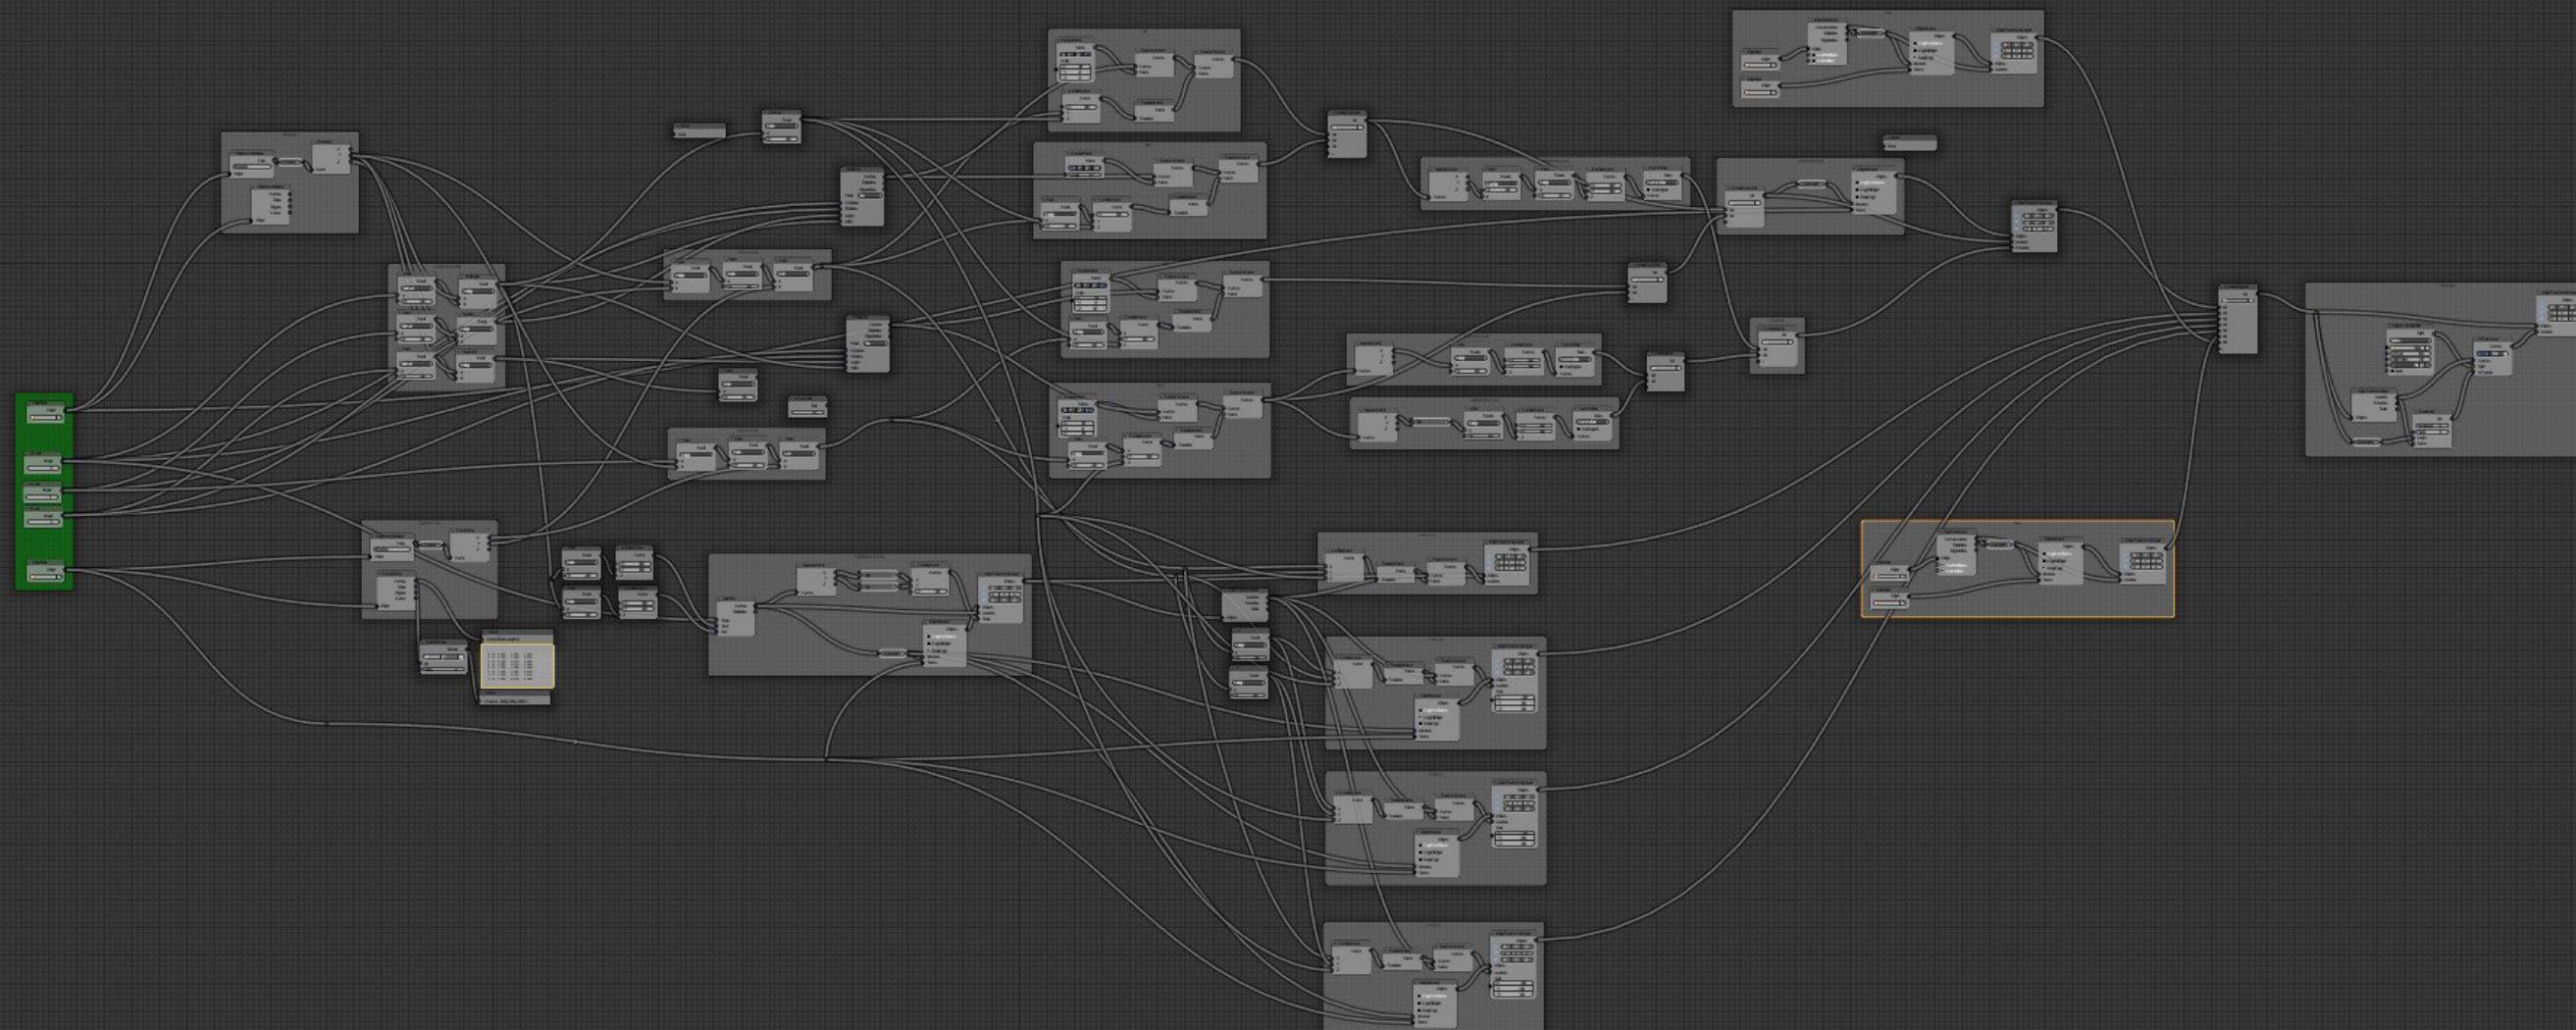

Truss in Sverchok.
Shell based curves.

Someday not vaporware, I swear:

- G'mic nodes
- Graphicsmagick
- Crossovers as they make sense
between different apps
